Community Videos

A health update, and here's a summary of links you posted to the blog in the comments - most of these were posted more than once, and we apologize for being unable to approve most of the comments with links in them until today - our only moderation staff were on a boat with a satellite net connection that failed right at the end of the swim. Thank you all for helping out.

Thank You!

I am so proud of my team, and I will admit I am also very proud of myself as well.

About this capture

Update Final Moments Before Arrival

Ops Chief John Barry called Diana over to the swim platform on Voyager to try to get her to follow the streamer and swim a direct route to Key West.

Update 4am

Our navigator John Bartlett is consulting closely with the other captains to plan the best route into Key West. There are tides, eddys, currents, shipping lanes, reefs and swarms of jellyfish to consider.

Follow the white line

As you can probably imagine, swimming a straight line or any sort of course through the Straits of Florida would be difficult, if not impossible. That's why Diana has Voyager, her escort boat, and John Bartlett, her navigator. John plots the course and then one of Voyager's drivers stays on that heading.

Keeping You Updated

Hi all, Chris Moschini here, Web Developer at Brass Nine Design, the company that maintains Diana's website. I came across some comments on some of the blog postings here wondering about the timing of blog posts, the map, etc, and how close to real-time they are.

Update 11pm September 1, 2013: Swim Time: 38:00

At 38 hours into the swim, 11 p.m. at night, winds rose suddenly reaching 23 knots twenty minutes later. At that time, the Nyad team went into squall protocol to bring the kayakers out of the water..

SEP 2 Posted 12:20am

Update 9pm. Swim Time: 36:01

Diana is still swimming in her jellyfish suit, but has not put on the protective mask. Shark divers jump in the water every 15 minutes to scout for any signs of box jellyfish or other stinging jellyfish-type creatures.

Nyad's last night in Havana, Cuba

Diana ate spaghetti with garlic and olive oil, just what she wanted, and drank some water. She appeared relatively calm, perhaps already mirroring the peacefulness of the waters promised by weather forecasters. She yawned.

You Don't Say...

As an "official" observer, it's my job, along with co-observe Roger McVeigh, to make sure Diana obey's rules associated with this competitive swim. Her handlers can feed her, rub chafing cream on her shoulders, apply sunscreen to her lips, and make sure she has enough water to stay hydrated.
