## No Stopping Her Now

photo Christi Barli

### Sunday 11:00am EST 19:17 Swim time

At 22.2 statute miles into a swim that started yesterday (Saturday) at 3:43 p.m., Diana, swimming steadily at 50 strokes per minute, looks very comfortable and confident.

photo Christi Barli

She seemed lifted at the news from her navigator, John Bartlett, that ~~there will be only one more full night of swimming, rather than two, if things hold.\*~~ (He means wind, waves, and weather.)

The dark night is usually the most difficult time for distance swimmers, although historically Diana has often enjoyed the nighttimes, singing to herself and thinking.

About this capture

time to rise to the surface is at night. Regardless, according to her crew at daybreak, "There's no stopping her now."

--Candace Lyle Hogan aboard Quest

**\*UPDATE 1PM EST: Apologies to all: in reporting to you, we strive for absolute accuracy under precarious conditions—fatigue, hard-to-hear VHF calls, etc. can lead to miscommunication. The following correction is very important: earlier today we reported that Diana would face only one more full night of swimming, but it will be two nights, a very significant fact considering that jellyfish rise to the surface at night.**
